Ahmedabad, India

Projects

1. EX-Sell

- Technologies: React.js, Node.js, Express.js, MongoDB
- Played a key role in creating a MERN stack peer-to-peer marketplace platform tailored for college students.
- Developed frontend components and layouts utilizing React.js, emphasizing usability and responsiveness.
- Created reusable components featuring category-based filtering and search capabilities.

2. Music Streaming Platform for Independent Artists

- Technologies: React.js, JavaScript, Supabase, CSS3, RESTful APIs
- Designed a responsive music streaming web application using React.js with reusable UI components.
- Integrated RESTful APIs to facilitate audio uploads, manage metadata, and enable dynamic music playback.
